Correct packing ensures safe delivery

At Nightfreight we like to work with you to make sure we deliver your products safely, that's why we've invited Rajapack, with 50 years of experience in packaging to offer a few simple but effective guidelines.

Correct packaging not only ensures your products arrive in the condition they left, it also gives you peace of mind and added value, meaning your customers will come back time and time again. Inadequate packaging is perhaps the biggest contributory factor to goods being lost or damaged in transit. At Rajapack they've a great selection of products to protect your goods against, bumps, knocks, scratches and shocks.

Packaging your product

Rajapack stock a huge range of quality cartons and boxes, and a variety of styles from standard boxes to long, reinforced, square, bottle and removal boxes, to pallet sized shipping crates. The type you need will depend on the level of protection you require. All Rajapack cartons and boxes are recyclable, and contain recycled content.

Loading cases

Rajapack loading cases with lids are an ideal way to transport large items or a variety of irregular sized products

Loading cases are easy to assemble and also available with an access panel

Cases & Containers

To create stable pallet loads stack boxes starting with the smaller sizes first. Alternatively use loading cases, which are also ideal for large consignments of goods. For heavy-duty transportation use plywood foldable boxes. All Rajapack boxes are easy to construct and come flat packed to save on space and are suitable for road and rail transport.

Single wall cartons are economical and ideal for everyday use.

Double wall cartons are strong and resilient and can resist crushing when stacked.

Triple wall cartons resist knocks, abrasions and temperature fluctuations and are ideal for export and transport.

Create stable pallet loads by using Rajapack pallet stable sized boxes and stacking small to large.

Reusable cases

For tough, reusable cases, use Rajapack plywood foldable boxes, available with or without a pallet. These cases come flat packed and are easy to assemble only requiring strapping to secure closure

Protect your product

Protecting your product from, shocks, scratches, knocks, bumps and general handling is vital in the packaging process. It's part of the process that means your goods arrive in mint condition, and help keep them that way in storage or in transit. Rajapack stocks a wide variety of protection products from void fill to wraparound protection.

Bubble Rolls

The most popular and versatile types of protective packaging are bubble, foam & corrugated wrap. These wrap your products and absorb shock, and are suitable for a wide range of goods, from small fragile items to heavy-duty products.

Protective Profiles

Corner and edge protection is essential for any sized items being moved, stored or shipped. Rajapack have a variety of foam, plastic and corrugate corner and edge protection to help ensure the product arrives in factory condition.

Air Cushioning

Air pillows can offer in-carton protection for irregular packaged goods. Air pillows are lightweight, mess free and can be produced on demand.

Foam blocks

Foam blocks and corrugated divider pads are ideal to interleave between products in a carton or provides in-carton cushioning. Foam will not scratch delicate surfaces, and provides heavy duty shock and impact protection.

Loose fill chips

You can reduce in-carton movement by filling with void fill products such as loose fill chips, which sits around the product to protect and reduce product movement within the carton.

Paper filling

Paper void fill is recyclable and can offer in-carton protection for irregular packaged goods and also provides excellent cushioning for fragile to heavy products.

"It's Personal"

Secure and strap your product

Securing your packaging is another vital step in ensuring your products are delivered to your customers in tact and nothing is lost or stolen.

At Rajapack there is a wide range of sealing options available, and not forgetting the all-important labelling and marking to give clear handling instructions?

Labelling & Packaging Tape

Rajapack's wide range of quality carton sealing packaging tapes strengthen and reinforce the seams of any carton or box, ensuring a secure seal. Use with a pistol grip dispenser for fast and accurate application.

Label and mark your products to ensure they are handled correctly by using Rajapack's pre-printed tape or labels. These highlight fragile, urgent and any special instructions, and are highly visible in red and white. Remember to use Documents Enclosed envelopes to ensure that any documents are never separated from their consignments.

Strapping

Strapping is suitable for a wide variety of applications including securing small parcels and large pallet loads and for bundling irregularly shaped items.

Corded polyester can be re-tensioned so is ideal for heavy loads, outdoor storage or consignments that are prone to movement, and steel strapping is ideal for sharp angled loads and awkward shaped products.

Polypropylene strapping for light to medium loads and short term storage. Polypropylene is the ideal choice and combines strength with a wide variety of uses.

Extruded polyester strapping and steel strapping both offer high breaking strain so are excellent for heavy duty loads.

Palletise and wrap your products'

During transit, palletised goods should be stabilised to ensure the loads are kept together. Stretch film is the most effective way to do this. Rajapack stock a large selection of stretch wrap depending on your needs.

Blown stretch film hand rolls are suitable for general wrapping and securing irregularly shaped pallets. It is ideal for use in cold storage and is also available with an extended core for use without a dispenser.

Extended core blown stretch film is simple to apply and requires no dispenser as it comes supplied on low friction cores that extend each end.

Edge guards help stabilise and reinforce your pallets, suitable for use with stretch film and strapping.

Rajapack have a variety of pallets suitable for export, warehouse packing, stacking and storage in wood and plastic. Rajapack also offer a wide range of warehouse, storage and handling solutions to help you, pack, wrap, protect and store.
